Prime Ecosystem Accounts Payable Automation

INTEGRATION BENEFITS:

- Automatically capture and process invoices from multiple sources including email, elnvoice or scanned hardcopy.
- Reduce costs, errors and time associated with manual invoice processing.
- Process your invoices faster and with ease.
- Perform real-time database lookups with Prime Ecosystem to validate and return the work order number, supplier ABN, work order total and amount remaining.
- Apply multiple exception rules (e.g. Invalid supplier, invalid or no work order number, duplicate invoice, bank details mismatch).
- Upload invoices as document transactions in Prime Ecosystem with the PDF attached and linked.
- Submit invoices via webform with supporting documentation.
- Improve visibility and control of your AP Workflow and overall financial position.

Take the hard work out of your Accounts Payable Processing with EzeScan's Automated Invoice Capture.

With intelligent automated data capture and seamless integration with Prime Ecosystem, EzeScan delivers the fastest, most cost effective method to effortlessly capture both your hard copy and electronic invoices directly into your accounts payable workflows. Save time, cut costs and reduce errors associated with manually processing your invoices and improve efficiency and visibility of your AP workflows.

Cloud Deployment

EzeScan's Accounts Payable Solution for Prime Ecosystem is now available as a SaaS offering in the EzeScan CLOUD. For you this means flexible and fast deployment with an affordable monthly subscription, without the software, hardware or management headaches. Future proof your accounts payable solution as your organisation grows and ensure data security.

Smart Capture

EzeScan smart capture technology allows EzeScan to automatically extract values from any location on your invoices. Extracted metadata can be validated against Prime Ecosystem using real time two way integration to ensure data integrity is maintained and exceptions are flagged. Flagged invoices can be reviewed in EzeScan's intuitive WebApps interface from anytime, from any location.

Automated Processing

Automate your accounts payable workflow with EzeScan and achieve touchless processing of your invoices. Automation includes the capture of emailed invoices from Office 365 mailboxes, invoice scanning, data capture, validation and upload to Prime Ecosystem. With EzeScan's process automation you can now achieve impressive gains in productivity and accuracy with little or no user input. Let your team focus on high-value tasks as EzeScan automates the rest.

Customisable Approval Workflows

Streamline your approval workflows by automating the routing of invoices to users. Custom workflows can be configured to automate the routing of invoices from your accounts team to designated approvers and back to accounts or Prime for payment. Approvals based on delegation can be configured with autoescalation along with summary notifications for outstanding approvals. EzeScan's user-friendly web interface provides your organisation the business agility you are looking for, ensuring invoices reach approvers faster, even on the go.

Seamless Integration

EzeScan provides 'out of the box' native integration with Prime Ecosystem. To the end user this means a seamless experience when capturing and registering documents. With a highly configurable interface, EzeScan provides rapid deployment measured in days not months ensuring a quick start to optimising your information.

How It Works

The EzeScan Advantage

EzeScan provides fast, cost effective capture and business process automation solutions including simplified document back scanning, accounts payable, robotic process automation, forms data extraction, mailroom/correspondence automation and highly integrated EDRMS capture. With thousands of installations in Australasia, North America and the UK, EzeScan is your ideal digital transformation provider.
